# NEX APP

ELECTRIC HEATING  
ELEMENTS  
FOR TOWEL RAILS

## Benefits

---

Take advantages of all NEX App benefits:

- › Connect to the central heating system or create autonomous electrical system
- › Regulate the temperature of the room or towel rail
- › Program the days and hours of heating in the bathroom or other room where the towel rail is used
- › You don't have to remember to turn off the heating function when you want to ventilate the room thanks to the sensor of open window / door
- › Regulate temperature and time of heating
- › Warm your apartment also after heating season
- › Protect installation against freezing
- › Eliminate the problem of hanging cables thanks to cover cable
- › Set the controller according to your needs – possibility of rotates controller by 330°
- › Install devices with cable without bathroom renovation

# Functionality

---

3 TIMERS:  
turbo, start-stop, delayed start

Daily and weekly  
work schedule

Three-level overheating  
protection

Temperature regulation  
from 30°C to 60°C

Possibility of rotates controller by 330°

Rooms temperature sensor

Low power consumption  
ULTRA-LOW-POWER

Protection against freezing  
(ANTIFREEZE)

Available application for IOS and Android

Sensor of open window/door

## With the **HeatME** App you can:

---

- Regulate the temperature with an accuracy of 1°
- Create a daily/weekly work schedule
- Control energy consumption and electric heating cost
- Remotely control the electric heating elements operation
- Adjust the room temperature with an external sensor
- Manage heating operation via mobile device
- Control several devices by one mobile
- Set the heater access password

# User-friendly interface

---

Lower temperature

TIMER:  
turbo, start-stop, delayed start

Increase temperature

ON/OFF

Connection to a external device  
and controlled  
via HeatME application

## What do you get with NEX?

---

- › **COMFORT** – no more moisture in bathroom
- › **LUXURY / WELL-BEING** – always warm and dry towels
- › **ECO FRIENDLY** – low power consumption in standby mode
- › **SAFETY** – three-levels overheating protection

- › **DESIGN** – adopt to any style and types of radiator
- › **COMMUNICATION** – LED panels indicated temperature and activated function

# Adjust electric heating elements to your heater

---

Towel Rail power [W] (75/65/20°C)	Electric heating elements power [W]
<140	120
140 - 260	200
260 - 380	300
380 - 520	400
520 - 620	500
620 - 750	600
750 - 890	800
890 - 1100	1000
1100 - 1500	1200

## Technical parameters

---

- › Nominal voltage: 230V, 50 Hz
- › Insulation class: Class I
- › Ingress protection class: IPX5
- › Radiator connection: ½"

## Colours of thermostat

---

chrome

white

silver

black matt

black

on request

## Types of connection

---

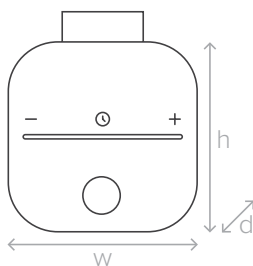

- › Masking cables
- › Straight cable
- › Spiral cable

## Dimensions

---

- › Height [h]: 56 mm
- › Width [w]: 56 mm
- › Depth [d]: 38 mm
